Michael will make the final call.
I'd vote to have it mounted on the west side of the pole. The PTZ should allow us to look north into the CVS parking and south into the alley behind 7-Eleven and still allow viewing of the intersection of Grant and Broadway.

Thank you Bailey.

Good afternoon Michael & Santa Maria team - I just wanted to follow up here and see if you have had some to decide on the placement of the camera? I'd recommend we take Bailey's approach as

we figure out the exact angle that you want. I want to make sure to get this project up and running for you guys, so please let me know when you get a minute. Feel free to call me directly as well at (206) 432-1524.

Talk to you soon.
- Anton

Hi Michael,
I'll answer for Anton- yes the home can be easily adjusted and additional preset locations can also be added by users with appropriate permissions.

However, the orientation of the camera on the pole still matters to be sure the camera is placed so that the pole doesn't block a view that is important.

Good afternoon Santa Maria PD,

A few more questions came up on the Condor install:

- Which side of the pole does Santa Maria want the camera to be on?
- What do you want to be watching most of the time?
    - We are guessing the intersection, but secondary viewing could be the parking lot to the N.

Please let us know when you get a minute. Thank you in advance.

Talk to you soon.

Flocks Solutions Consultant, @Dustin Soptich, is working on getting it mapped out right now. I've also included some of the other members of the Flock team that have been working with me on this project. Additionally, I've included some marketing materials that you can hand out to the community to provide more information on Condor. That document is attached to this email.

Subject: FW: Santa Maria - Condor

Michael –

Flock safety is interested in providing SMPD a camera to test and evaluate. Tentatively they would like to install it on 10/16/23. Please coordinate with CSU/DB to find a suitable to location. Then, please coordinate with Antouan and the City to expedite the permit process.

Antoun will be sending some marketing materials so CSU can share and demo this solution to local businesses and other City departments who are frustrated by crime or want a preventative solution.

Thank you,

Dan

Commander Cohen,

I have some good news for you. I've been able to get a Condor camera approved for Santa Maria PD for you guys to play around with. Please let me know if you have a few minutes to connect.

Talk to you soon.
